- | | |
|-------------------------|----------|
| • English Advanced (C1) | • Scrum |
| • Spanish Native | • Kanban |

EXPERIENCE

EAX Technology | *Fullstack Developer*

Buenos Aires, Argentina | **03.2023 – 10.2023**

Treasure Microservice: microservice which serves as a treasury module, responsible for managing revenue collection, payments, and cash control for a municipal entity.

- Lead the development using Node.js, Express, and React.
- Successfully implemented RabbitMQ to ensure effective communication between services.
- Successfully implement the API REST model to ensure efficient data distribution.
- Designed stunning visual interfaces to effectively display static information.

Document Management System: migration from a Document Management System originally developed on Visual Basic to a C# Web Application.

- Contributed to the new design of the structure to provide centralized information to 37 branches across the country.
- Developed API REST using ASP.NET MVC.
- Detected and resolved bugs in the methods used to retrieve database information.

Technologies: C# · ASP.NET MVC · RabbitMQ · PostgreSQL · Node.js · Express.js · Docker · React.js · TypeScript

Integrator Projects carried out within the framework of the Certified Tech Developer Career at Digital House.

Intermediate Project DigitalBooking.com

Final Project DigitalMoney.com

- Estimation of the development of the website to be created
- Development of functionalities and page design
- Responsive development for all types of devices
- Consumption and integration of APIs
- Maintenance and bug resolution

Technologies: MongoDB · JavaScript · Gitlab · React.js · TypeScript · Cascading Style Sheets (CSS) · HTML · SASS · Redux.js · Jest · Git · Agile Methodologies
